

Project Profile

New Housing | Pooles Wharf

Client	BSG Developments
Client Sector	Apartments
Project Value	£1m
Services Provided	Cost Management

This project involved the conversion of an existing building and construction of new three storey building to provide 25Nr 2 bedroomed flats for social housing needs.

The construction was contained within tight site boundaries of a main road and harbour front. A sub-basement carpark was created under the new build construction.

The houses and flats at Pooles Wharf Court are built on a site which was a commercial Sand Wharf until the early 1990s, supplying sand for the building trade.

Back in the 1800s part of the site was used as a Coal Wharf supplying the local population and Steam-Ships which visited the Bristol Docks.
